Introduce yourself and tell us why you chose this course.

Hi Everyone,

I am Deepak Kumar from Sangam City Prayagraj. I have completed my schooling from Saraswati Bal Mandir Inter College, Prayagraj with 76 percent in 10th standard and 79 percent in 12th standard. I am Mechanical Engineer Graduate from Rajkiya Engineering College, Azamgarh. Recently I am pursuing Data Science program in EdYoda Digital University. I am Gold medalist in Martial arts in 40kg category. Recently I have achieved certificate of excellence in Python language from Edyoda Digital University. I did my project named as Gym Membership Application during Python Examination duration 30 hours. My strength is my positive attitude, punctuality and versatile in nature. My hobbies are playing online games as well as watching web-series and trading and watching market in cryptocurrency is one of my hobbies. My aim to get placed in organization where I can build my career, utilize and enhance my skills and knowledge.

That's very interesting question and I am feeling very pleasure to answer this question. In this world data is everything as we know and each and every industry have data, well, this data helps to understand how your business is going and also you can predict how should be your business in future. In any corner, these all things attract me to choose Data Science program. In the coming times this world needs a data scientist. I like these kinds of stuff where we can clean data, visualize the data in basis on what is useful or not. It may be challenge to arrange from raw data to organized data but I like challenges. As future aspect, I choose this program because once you understand how data works in real time then you can predict what would happen next. In the basis of data, we can take precautions and improve our business strategy. That's why I have decided, I am going with this program to achieve my goals.

Thanks & Regards,
Deepak Kumar
